

RCRA Corrective Action Site Progress Profile

CECOS INTERNATIONAL INC
ID: (OHD087433744)

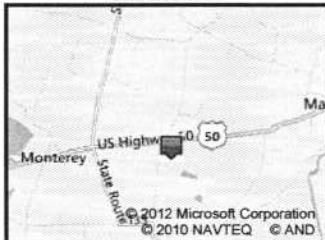

This profile is meant to provide you with basic information on EPA's cleanup progress at this RCRA facility. Please use the links in the "More Details" box for additional information.

Site Location

EPA Region 5 implements and enforces the RCRA corrective action program for Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin and Tribal Nations

Site Address:
CECOS INTERNATIONAL INC
5092 ABER RD
WILLIAMSBURG, OH 45176
County: CLERMONT

US Congressional District: 2
Population within 1 mile: 275

For further information on this corrective action site, contact region or state in which this site is located.

Cleanup Progress Summary

Hazardous wastes are managed under the Resource Conservation and Recovery Act. When these wastes contaminate the land, water or air they must undergo "corrective action."

A Remedy construction has been completed for this corrective action site.

[View detailed list of cleanup activities >>](#)

[View information on what controls are in place to protect human health and the environment >>](#)

Environmental Impact Summary

If this corrective action site has been examined to determine if human exposures to contaminants are under control and the migration of contaminated water is under control, that information is provided below.

Human Exposure Control

At this site, human exposures are under control.

Migration of Contaminated GW Control

At this site, migration of contaminated groundwater is under control.

Contamination & Exposure

Contamination:

Information on the contamination and the reason for the cleanup may be available. For further information, see the contact information provided above, or try the [Statement of Basis](#) Web Page to see if a Statement of Basis for the corrective action remedy has been provided to EPA.

Exposure:

Is human exposure to contamination at this site under control?
Is the migration of contaminated groundwater at this site under control?

YES
YES

The Solution: Cleanup Process & Progress

Cleanup Activities at this site:

Action	Date/Status
1. Site Assessed	12/29/1986
2. Site Identified for Corrective Action	Y
3. Solution for Cleanup Selected (Final Remedy Decision)	09/29/1994
4. Solution for Cleanup is Implemented	08/04/1998
5. Cleanup Complete	

Controls in Place at this site:

There are many types of controls that can be put in place to control human exposure to contaminants and the migration of contaminated groundwater from the site, and protect the effectiveness of cleanup remedies. Engineering Controls are mechanisms that work by physically controlling access to the land, the flow of water, etc. Examples include fences, cement caps over contaminated areas, and pumps. Institutional Controls (ICs) (also known as land use controls (LUCs) [\[Full disclaimer\]](#)), activity and use limitations (AULs), and environmental use restrictions (EURs) are administrative and/or legal controls, that work by limiting land or resource use. Private (or proprietary) examples include deed restrictions, covenants and easements. Public (or governmental) examples include zoning ordinances and groundwater permitting programs.

Are controls in place at this site?	Type of Control(s):
Institutional Controls: Yes	Information Devise(ID)
Engineering Controls: Yes	

Government Performance & Results Act (GPRA) Milestones

EPA is required to report on the following milestones under the Government Performance & Results Act. [More information...](#)

Milestone	Status
-----------	--------

Human Exposure Under Control	YES
Contaminated Groundwater migration Under Control	YES
